- Access to credit for all? Microcredit?
 - Rigorous microcredit studies find mixed results on the impact of access to credit by the poor (Pitt and Khandker, 1998; Morduch, 1998; Khandker, 2003; Karlan and Zinman, 2006; Coleman, 1999)

- Credit for Growth; Basic financial services for all?

finance income inequality and poverty reduction.

Economic effects of inequality

- IMF research: higher levels of inequality
 - Build up unsustainable household debt levels leading to financial crisis (relatively closed economies)
 - Increase current account deficits and thus international debt in financially open economies (avoided by some developing countries due to low financial openness)
 - Shorter durations of GDP growth
